

Gurdjieff Oskiano

21-September-2023

Presentation by Robin Bloor:

Gurdjieff and Kundabuffer

Attendees: Robin, Paula, James, Robert D, Robert P, Kelly C, Bobbie P, Stephen F, Sandra W, Ofelia L, Gwynne M, Marnie H, James O'D, Sasa, Michelle F.

SF: The truth that we cannot bear that this high commission implanted kundabuffer to prevent us being aware of the fact that I am part of a very impersonal process in order to produce a certain amount of energy in my life and at my death.

Not very pleasant.

Interesting that kundabuffer is implanted at an early age and disappears before my birth. There was something that had to be hidden at that stage so that I don't choose to abort myself and all the nutrients turned into pleasure. What is that terror at the very beginning. Realising I don't want to manifest at the physical level and that it will be used by a higher process.

All the consequences – things we have done for ourselves – new forms of suffering to distract from the fact that our lives were so worthless in the first place.

RB: In order to have an answer to that we have to propound some theory as to what we are at conception. I suspect we have some memory of what we were before conception. I can't point to any evidence. Don't know if an embryo has ability to top itself – suspect it does and would lead to a miscarriage.

SW: Called spontaneous abortion – I had one. Didn't realise I was pregnant.

RB: Men have no experience – in the way that women do. My guess is you do know something when you are conceived and kundabuffer makes you forget it. When you get to the age of three and tell people about it you will be told by your parents to shut up. When we try to work on ourselves and to remember history – goes into a fog.

Reorient ourselves to if we can get something out of this life for ourself is a huge win.

GM: I think we are a living allegory. Part of us that wants to make it linear – intellectual understanding. Personality wants to do that. Kundabuffer and kundalini – always combined. Kundalini is energy. We stop the process by programming the way we see kundalini – our thoughts create such trauma in our system. G is brilliant the way he deals with personality – always working through kundabuffer. Can get through that but not through intellect.

RB: From Madame de Salzmänn in Reality of Being. Intellectual center is just a function and emotional center and moving center. If we have a special skill that has depended upon various activity going on in a center – likely to identify with it and glorify it.

You spend years working on a mathematical problem and succeed in proving a theorem – now you have a problem because you are famous. Sportsmen who are best at whatever and at some point their life is over. When G talking about kundabuffer and says it creates the fantasy – if the guy that solves the problem thinks about it, should just think 'that is Thursday' – not important. Appears that kundabuffer is the platform for personality. Grew up with arrogant streak and now will feel ashamed if it bubbles up.

It gives you the resisting force to struggle with. But 99.99% of mankind doesn't struggle.

SW: List of negative characteristics is helpful ...

Zilnotrago – just because it has trago in it – think of Trogoautoegocrat.

RB: Trogoautoegocrat is one of the important ideas in the work. Picking off key topics ... that is what I am doing. Message of Trogoautoegocrat is same as kundabuffer but told from a different perspective. But it requires that the right amount of substance in the right place at the right time. Easy to understand in terms of food. Need protein ... if don't have will die. Oxygen – if you stop breathing oxygen right amount would not be in right place at right time and you would die. Trogoautoegocrat ... has consequence that everything gets used up. Take the ocean – things living in it and dying and excreting and bottom feeders living off that stuff. If it doesn't get eaten by bottom feeders gets eaten by planet's surface. Comes out of volcano. White blood cells that go and Hoover up the garbage ... all Trogoautoegocrat. Zilnotrago – certain amount of sexuality required for species to continue but with man is a disharmonised function and a waste of energy that could be used for self perfection that is not being used for self perfection and will be used for something else. Population of the planet is increasing. According to G the way it is – we aren't spending enough time on self perfection and ... not creating enough of the higher energies to feed the moon. H24 energy of self remembering. Plasma – would float up and feed the moon while we are alive.

SW: The Moon is our enemy. Find the moon inside me – find the enemy? Feeding the moon while we are alive.

PS: Analogy of menstrual cycle and earth feeding moon 5 days a month.

SW: Moon child of Saturn, not Sun?

RB: Probably Saturn – all have similar degree lean – 24deg. Would imply others that have vertical axis probably children of the Sun. Mars and Earth are brothers.

RB: Ray of Creation in you and have to grow moon in you. Planetary body that has a psyche ... doing with sensation. Sensation and non-expression of negative emotion how to feed the moon. When Jesus turns to Peter and tells him he is the rock on which to build the church – he is the moon. What is moon in humanity – should be being sensitive to the nature of our planet ... what we are doing is not helping us sense the planet - building roads and high buildings ... leads to nothing. Normal man – unsatisfiable demand to entertain.

SW: Sun contains planet and moon at its core – still.

RB: We are from the side octave and that has a consequence. Talk about ray of creation – can be described entirely as an electrical phenomenon. Cathode is size of universe and emits positively charged particles. Negative absolute can be found in centre of moons planets and suns and whole of universe is flow of electricity from negative absolute at center of a ball that we would call moon, planet or sun. Reason the positively charged particles are attracted to north and south poles of planet is that there is a permanent development of negative charge in the center of the planet. There is a mi/fa interval – do, re, mi ends in a planet. The sun is feeding the individual planets via solar winds and mediating force has to be the other planets.

Where does that leave human beings ... not in the picture at all, but there is a necessity to deal with the evolution of substances on those spheres and it appears that the particle that enables that is okidanokh. Oki is soul – that which gives soul. Appears that every living moving thing – 1,2,3 brained and possibly angels and archangels has a small amount of that and is the seed that will either disappear at a death or will go on to accumulate ... doesn't have a life outside the sun. Even if you perfected yourself to the level of the sun if the sun died you would die too. How does anything rise beyond that ... no answer.

MH: Three archangels and connection with human body. Sakaki large intestine ... Algamatant, small intestine and Looisos the womb. Curious about use of those three organs connected with kundabuffer –

why those three organs or parts of human body would have been selected for being responsible for the origin of kundabuffer.

RB: Did a lot of work in the book to understand what happens when a woman gets pregnant. Connection with vagus nerve and intestine – major determinant of what you want to eat. Bacteria in gut – as many as cells in body. Algalant and relationship with bacteria determines what a woman will eat. Large intestine and womb also change behaviour. Not much else does. Archangels are parts of body and how they govern you – Hariton is lungs ... Tales is instruction on how to use them properly.

Haven't done it all.

Read in some Russian text that Sakaki was sack of shit and got me thinking ... not having a laugh – telling us something. Took me a long time to think of Loosos as the womb – didn't think of as organ of secretion. A lot of detail in the book.

Our science doesn't know a lot of things. Plasma behaviour ... may not be able to trace. Hormone movement, for instance. Link between these three and growing fetus may be greater.

MH: Thin of impressions as a vehicle for impressions. If we count the womb as organ of excretion would have connection with digestion. Kundabuffer has connection to impressions. Our digestion of impressions is faulty?

RB: Three organs that digest impressions. The intellectual center and emotional and moving. Counterpart is instinctive center – does inner work. These are just functions. When we digest food comes in as H786 goes to H3XX and to H192 – three step process. Carbs broken down in two step process ... When you perceive something – bring H12 to H48 to organ of perception. H24 – bring H6 to result in H12. Energy in body from ATP – digestion of oxygen is first step ...

At some point someone will take what I have done and add more detail.

SF: Also interesting that 2 intestines and womb grouped together as high commission. America screwing up food and sex. Those are associated with 2 intestines and womb. 2 main engines of evolutionary process. Would be forced to conclusion that only reason I am here is turn food into shit and produce some babies. If that was all there is ...

Still unclear about nature of moon. On p9 The Moon is man's big enemy. Feeding moon is keeping me asleep. We are a whole system .. inside we have moon, sun and so on ... So moon is taking our energy against our will and also necessary. Upper has to be built on foundation of lower. Moon has ambivalent role inside us.

RB: I think it is fair to be confused. Looking at one cosmos through the life of another cosmos. How would you feel about being a bacteria in the life of another being? The bacteria fill the interval in the ray of creation in the life of man – they are our Earth. Don't find poem saying wish I was a bacterium. Man isn't praiseworthy. Should be making Moon in nature – farmer of planet. Think symbol of garden of Eden has that in it.

G often presents both sides of the argument without trying to resolve it – the person who has to resolve it is you.

Gwynne Mayer (in chat)

The Moon is on the menstrual cycle
it regulates the cycles

Saturn is the gateway between inner planets in the plasma area and the outer planets

Mars is the immature masculine so Musk might need it to reform

Jesus was born on the Saturn Jupiter Conjunction star of Bethlehem

The Moon guides Celtic Matriarchal mythology

That means we have to develop sensing/feeling

we overthink which is not the Moon function

.....
